Projects ([Link](#))

Front-End (HTML,CSS,JAVASCRIPT)

- **Portfolio:** Built a portfolio website with Home, About, Projects, and Contact pages to showcase work and enable connections.
- **Calculator:** A simple web-based calculator built with HTML, CSS, and JavaScript, providing an intuitive interface for basic arithmetic calculations.
- **E-Commerce Website (React.js):** Created a responsive e-commerce site with React.js, featuring product browsing, search, cart, checkout, API integration, Stripe/PayPal, Firebase, and JWT authentication.

Back-End (Spring Boot)

- **Book Store:** This project is a web-based application designed to collect, manage, and display book-related statistics, including information about authors and books.
- **Spring Boot** facilitates rapid development by providing built-in support for database connections, RESTful APIs, and security configurations, making it well-suited for managing large volumes of book data.

DataBase (MySQL)

Student Management System: This software application is designed to simplify and optimize the organization and management of student data for educational institutions.
